

Wireshark Network Traffic Analysis Report

1. Overview

This report provides a detailed professional analysis of captured network traffic using Wireshark. It includes protocol statistics, conversations, endpoints, and visual screenshots of captured packets on created network traffic

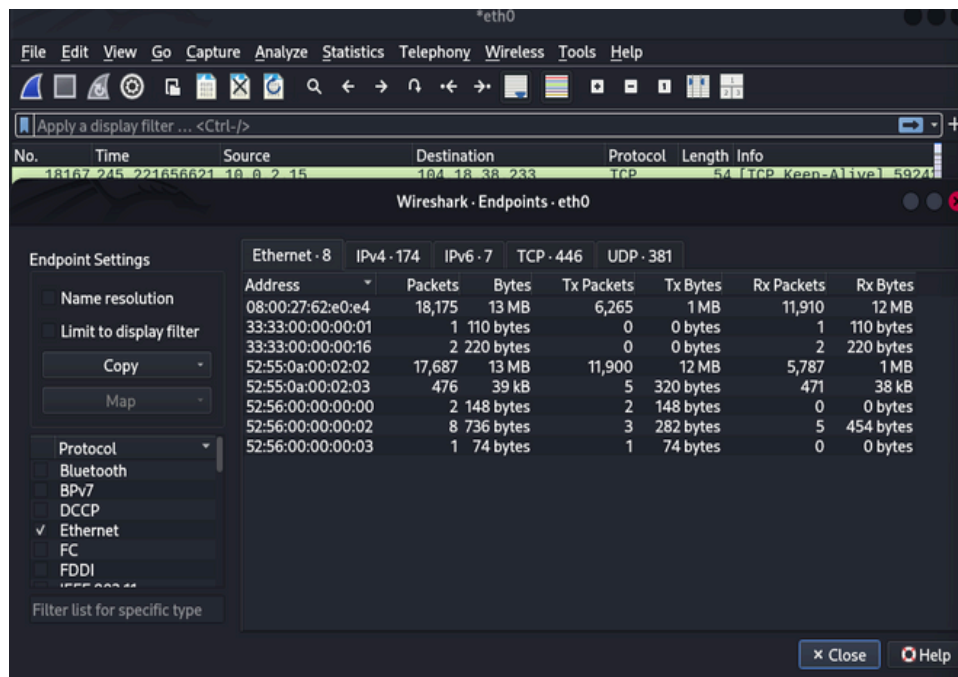

2. Conversations Analysis

The following screenshot shows the Wireshark conversation window, including TCP, UDP, and Ethernet conversations.

3. Endpoint Statistics

The screenshot below illustrates the traffic endpoints, showing packet counts, transmitted bytes, and received bytes for each network interface or MAC address.

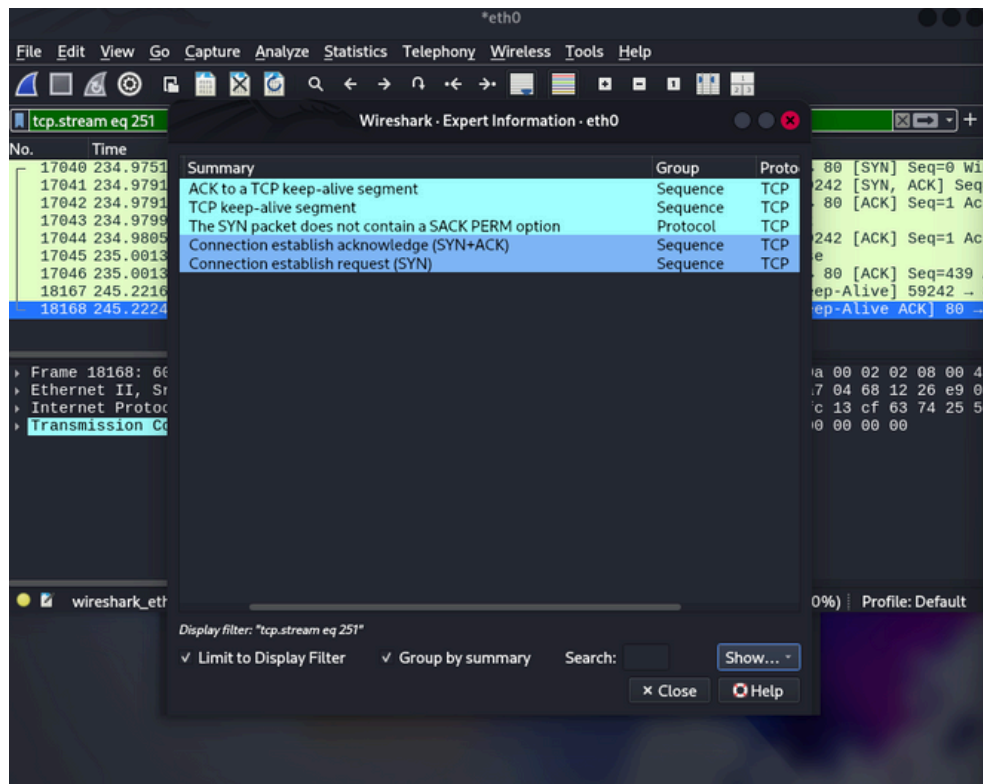

4. I/O Graph

The screenshot below shows the traffic input/output graph

4. Expert Information

The screenshot below shows the expert information about captured packets

4. Summary

This report successfully documents key insights and visual evidence from Wireshark traffic capture. Further analysis can include protocol hierarchy, IO graphs, and expoert informations.
